INDEX TO VOLUME LX

ADRENALS, relation of, to fatigue, 255.

Albino mice, adaptation of, to tropical environment, 397, 416, 425, 434, 443.

Alcohols, polyhydric, narcotic effect of, 496.

——, stimulant action of, 151, 270.

——, successive stimulation by, 274.

Alkaligenesis in tissues, 519.

AMBERG, S. and M. E. MAYER. The isolation of a substance from urine having properties of citric acid. Description of an apparatus facilitating the working with small volumes of gas, 564.

Amoebocyte tissue, factors influencing outgrowth of, 277.

Anemia, cerebral, cardio-vascular changes during, 1.

Anoxemia, extreme, cardiac changes during, 155.

ASCHAM, L. See SMITH and ASCHAM, 250.

Asphyxia, carbon monoxide, 244.

Autonomic fibers, regeneration of, 350.

BAKWIN, H. The significance of hydremia in the secretion of urine, 343.

BASSETT, S. H., E. HOLT and F. O. SANTOS. The influence of meat upon physical efficiency, 574.

BERCOVITZ, Z. Studies on the visceral sensory nervous system. XII. The response of the isolated esophagus of the frog and the turtle to certain drugs, 219.

Beriberi, water content of tissues in 234.

Bile salts and pigments, variations in output of, 119.

BLANCHARD, K. C. See LOEB and BLANCHARD, 277.

Blood morphology of mice, effect of humid heat on, 443.

—— pressure response to tissue compression, 323.

—— —— waves produced by slow and rapid breathing, 500.

—— serum, influence of, on coagulative activity of tissue extracts, 193.

Body form and surface area, relations of, to tropical environment, 416.

BURGET, G. E. and M. E. STEINBERG. Studies on the physiology of gastro-enterostomy. I. The regurgitation of intestinal contents in normal dogs and dogs with posterior gastro-enterostomy, 308.

BURLAGE, S. R. A study of the regeneration of the autonomic fibers in the vagus nerve of the sheep, 350.

CANNON, W. B. and P. E. SMITH. Studies on the conditions of activity in endocrine glands. IX. Further evidence of nervous control of thyroid secretion, 476.

—— and F. R. GRIFFITH. Studies on the conditions of activity of the endocrine glands. X. The cardio-accelerator substance produced by hepatic stimulation, 544.

Carbon monoxide asphyxia, 244.

Cardiac changes during extreme anoxemia, 155.

Cardio-accelerator substance produced by hepatic stimulation, 544.

Cardio-respiratory interference waves, 500.

Cardio-vascular changes during cerebral anemia, 1.

Circulation, response of, to low oxygen tension, 155.
Citric acid, substance in urine with properties of, 564.
Climate, tropical, effect of, 397, 416, 425, 434, 443.
Coagulative action of tissue extracts, influence of blood serum on, 193.
CRILE, G. W., H. R. HOSMER and A. F. ROWLAND. The electrical conductivity of animal tissues under normal and pathological conditions, 59.
CUNNINGHAM, R. S. Studies in placental permeability. II. Localization of certain physiological activities in the chorionic ectoderm in the cat, 448.

DAVIS, L. E. Vasomotor responses obtained by slowly interrupted faradic stimulation of the thoracic sympathetic nerve, 560.
DEGENER, L. M. Studies on the effect of diet on the weight of the hypophysis and thyroid gland of the albino rat, and on the action of their extracts on the isolated small intestine, 107.
Diet, effect of, on hypophysis and thyroid gland, 107.
Dietary, significance of meat in, 574.
Duodenal contraction by sodium carbonate, 48.

EDSON, P. See TROTTER, EDSON and GESELL, 500.
Electrical conductivity of animal tissues, 59.
Endocrine glands, conditions of activity in, 476, 544.
Epinephrin, liberation of, in traumatic shock, 461.
Esophagus, isolated, response of, to certain drugs, 219.

FATIGUE, relation of adrenals to, 255.
FEIL, H. and D. D. FORWARD. The pulse in the portal vein, 312.
FORWARD, D. D. See FEIL and FORWARD, 312.

GASTRIN theory, physiological test of, 578.
Gastro-enterostomy, physiology of, 308.
GESELL, R. See TROTTER, EDSON and GESELL, 500.
GILBERT, N. C. See GREENE and GILBERT, 155.
GREENE, C. W. and N. C. GILBERT. Studies on the response of the circulation to low oxygen tension. VI. The cause of the changes observed in the heart during extreme anoxemia, 155.
GRIFFITH, F. R. See CANNON and GRIFFITH, 544.
Growth and fertility of mice, effect of tropical environment on, 397.
—— —— pigmentation of hair, effect of tropical climate on, 425.
——, appetite and, after splenectomy, 250.
—— of neuroblast in presence of carbon monoxide, 244.
GULICK, A. A study of weight regulation in the adult human body during over-nutrition, 371.

H- and OH-ions in intestinal activities, 52.
HAGGARD, H. W. Studies in carbon monoxide asphyxia. II. The growth of neuroblast in the presence of carbon monoxide, 244.
HAMMETT, F. S. The rôle of the change in hydrogen-ion concentration in the motor activities of the small intestine, 52.
—— and J. E. NOWREY, JR. The rôle of the sodium and the carbonate ions and of the change in the sodium-calcium ratio in the concentration of the isolated duodenal segment of the albino rat, 48.

Hartman, F. A., R. H. Waite and E. F. Powell. The relation of the adrenals to fatigue, 255.

Hashimoto, H. The secretory action of the pancreas in relation to the thyroid gland:

I. The effect of thyroid feeding in rats upon the secretory action of the pancreas, 357.

II. The effect of thyroidectomy in rats upon the secretory action of the pancreas, 365.

Hepatic stimulation, cardio-accelerator substance produced by, 544.

Holt, E. See Bassett, Holt and Santos, 574.

Hormone, nervous and, control of respiratory center, 134.

Hosmer, H. R. See Crile, Hosmer and Rowland, 59.

Hydremia in secretion of urine, 343.

Hypophysis, effect of diet on, 107.

Intestinal activities, H- and OH-ions in, 52.

—— contents, regurgitation of, after posterior gastro-enterostomy, 308.

Irwin, M. Sensory stimulation by saturated monohydric alcohols, 151.

——. Sensory stimulation by unsaturated alcohols, polyhydric alcohols and chlorhydrins, 270.

——. Successive stimulation by alcohols, 274.

Ivy, A. C. and J. E. Whitlow. The gastrin theory put to physiological test, 578.

Kleitman, N. Studies on the visceral sensory nervous system. XI. The action of cocaine and aconitine on the pulmonary vagus in the frog and in the turtle, 203.

Krause, D. J. The water content of the tissues in experimental beriberi, 234.

Light and heat, effect of, on resistance of mice to acetonitrile, 434.

Loeb, L. and K. C. Blanchard. The effect of various salts on the outgrowth from experimental amoebocyte tissue near the isoelectric point and with the addition of acid or alkali, 277.

Macht, D. I. and G. C. Ting. The effect of some polyhydric alcohols on the behavior of rats in the circular maze, 496.

Macleod, J. J. R. and S. U. Page. The relationship between nervous and hormone control of the respiratory center, 134.

Martin, K. A. and H. L. White. Blood pressure responses to hypersystolic compression of tissues, 323.

Mathews, S. See Mills and Mathews, 193.

Mayer, M. E. See Amberg and Mayer, 564.

Mills, C. A. and S. Mathews. Influence of blood serum on the coagulative activity of tissue extracts, 193.

Nerve fiber during excitation, ammonia production in, 519.

——, thoracic sympathetic, vasomotor responses from, 560.

Nervous and hormone control of respiratory center, 134.

—— control of thyroid secretion, 476.

—— system, visceral sensory, 203, 219.

—— tissue, action of carbon monoxide on, 244.

Nowrey, Jr., F. E. See Hammett and Nowrey, 48.

Over-nutrition, weight regulation in man during, 371.

Oxygen tension, low, responses of circulation to, 155.

Page, S. U. See Macleod and Page, 134.

Pancreatic function, relation of thyroid to, 357, 365.
Physical efficiency, influence of meat on, 574.
Pigments, bile salts and, variations in output of, 119.
Placental permeability, 448.
Portal vein, pulse in, 312.
Powell, E. F. See Hartman, Waite and Powell, 255.
Pulse in the portal vein, 312.

Rapport, D. Studiesin experimental traumatic shock. VI. The liberation of epinephrin in traumatic shock, 461.
Respiratory center, nervous and hormone control of, 134.
Rowland, A. F. See Crile, Hosmer and Rowland, 59.

Santos, F. O. See Bassett, Holt and Santos, 574.
Sensory stimulation by saturated monohydric alcohols, 151.
Shock, experimental traumatic, 461.
Smith, A. H. and L. Ascham. The relation of splenectomy to growth and appetite in the rat, 250.
Smith, P. E. See Cannon and Smith, 476.
Splenectomy, appetite and growth after, 250.
Steinberg, M. E. See Burget and Steinberg, 308.
Sundstroem, E. S. Studies on the adaptation of albino mice to an artificially produced tropical climate:
I. Effect of the various factors composing a tropical climate on growth and fertility of mice, 397.
II. Relations of the body form and especially the surface area to the reactions released by and the resistance to a tropical climate, 416.
III. Effect of the tropical climate on growth and pigmentation of hair and the dependence of these integumental functions on the temperature coefficient law, 425.
IV. Effect of light and heat on the resistance of mice to acetonitrile, 434.
V. Effect of humid heat on the blood morphology of mice, 443.

Tashiro, S. Studies on alkaligenesis in tissues. I. Ammonia production in the nerve fiber during excitation, 519.
Thyroid gland, effect of diet on, 107.
——, relation of, to pancreatic function 357, 365.
—— secretion, nervous control of, 476.
Ting, G. C. See Macht and Ting, 496.
Tissue, amoebocyte, factors influencing outgrowth of, 277.
—— compression, blood pressure response to, 323.
—— extracts, influence of blood serum on coagulative activity of, 193.
Tissues, alkaligenesis in, 519.
——, animal, electrical conductivity of, 59.
——, water content of, in beriberi, 234.
Trotter, R. T., P. Edson and R. Gesell. A comparison of waves of blood pressure produced by slow and rapid breathing, 500.

Urine, hydremia in secretion of, 343.
——, substance in, with properties of citric acid, 564.

Vagus, pulmonary, action of cocaine and aconitine on, 203.
—— regeneration, 350.
Vasomotor responses from thoracic sympathetic nerve, 560.
Visceral sensory nervous system, 203, 219.

WAITE, R. H. See HARTMAN, WAITE and POWELL, 255.
Water content of tissues in beriberi, 234.
Weight regulation in man during overnutrition, 371.
WHIPPLE, G. H. See WISNER and WHIPPLE, 119.
WHITE, H. L. See MARTIN and WHITE, 323.
WHITLOW, J. E. See IVY and WHITLOW, 578.
WINKIN, C. S. An analysis of the nervous control of the cardiovascular changes during occlusion of the head arteries in cats, 1.
WISNER, F. P. and G. H. WHIPPLE. Variations in output of bile salts and pigments during 24-hour periods, 119.
